## WORK EXPERIENCE

### Upwork

#### Contractor

Apr 2010 - Jul 2024 • 14 yrs 4 mos

I have taken odds jobs and long-term WordPress projects throughout the duration of my stay in the platform. The work spans from quick fixes, small-scale work, to the large-scale enterprise projects. I have built my whole career in UpWork. Sadly, I have to walk away from this platform since it is now overrun with bot applicants, fake job posts, and predatorial fees.

### Firekamp

#### Web Engineer • Full-time

Oct 2020 - Dec 2023 • 1 yr 3 mos

I am engaged in diverse projects spanning WordPress, Shopify, Kajabi, and React applications. My primary responsibility is frontend development, with occasional involvement in no-code development.

### The Code Company

#### Frontend Developer • Full-time

Feb 2021 - Oct 2021 • 9 mos

I worked as a front developer, converting Figma/XD designs into WordPress themes. My work involves working with Gutenberg, ACF Blocks, mobile responsiveness, speed optimization, and handling data migration from Drupal to WordPress.

### Volt Edge Training

#### Fullstack Engineer • Freelance

Jan 2019- Feb 2020 • 1 yr 2 mos

My work involves API integration and propagating the data into their course calendar data. I make sure connections are seamless. I created the platform for students' reservations and payment portals. I am given no-code tasks when I am not web developing, particularly updating the themes, plugins, and site content.

### Wakeup-World.com

#### WordPress Developer, Technical Administrator, and Site Maintainer • Freelance

Jan 2015 - Oct 2019 • 4 yrs 10 mos

I worked as a WordPress developer— implementing site features and then followed by a role as a technical administrator which involved site maintenance, change requests, website security, speed optimization, and ad tech.

## **In8sync**

**WordPress Fullstack Developer** • Freelance

Jul 2017 - Aug 2018 • 1 yr 2 mos

My work involves the integration of NetSuite API for their WooCommerce plugin. This responsibility also includes the configuration of their client's NetSuite account and WordPress site so that they work properly and data are synced on both platforms.

## **HSC CoWorks Bondi Junction, Chatswood, Mosman & Virtual**

**Web Developer** • Freelance

Nov 2015 - Feb 2016 • 4 mos

I develop and ship out features from their existing educational platform. My responsibility covers the creation of the student dashboard and their messaging system (chatbox) which are interacted with by the teacher and students.

## **Split5.com**

**Project Lead and Fullstack Developer** • Freelance

Aug 2014 - Jan 2015 • 6 mos

My role encompasses managing a 3-piece team and ensuring specifications are being followed by the junior developers. Aside from the lead role, I handle complex tasks which involve backend and frontend work. NOTE: The company is no longer operating.

## **Arrow Root Media**

**WordPress Developer** • Freelance

Mar 2014 - Jan 2015 • 11 mos

I customized existing themes and extended plugins for their clients. My objective is to ensure the client's specifications meet the standards.

## **Distressed Pro**

**Web Developer** • Contract

Feb 2014 - Jan 2015 • 1 yr

My work involves developing the theme for the site. I have also provided site maintenance and website security.

## **Plugin Dynamo**

**WordPress Plugin Developer and Technical Support • Freelance**

Apr 2014 - Sep 2014 • 6 mos

My work here is two-fold. I handle technical support, working through the tickets while also working as a WordPress developer which involves fixing bugs. The bug fixes will later be shipped out during the next version release. NOTE: The company is no longer operating.

## **The Web Craftsmen**

**WordPress Plugin Developer • Freelance**

Mar 2014 - Jul 2014 • 5 mos

My work involves developing their client's WordPress plugin.

## **ND5 Media LLC**

**WordPress Theme Developer • Freelance**

Jan 2012 - Apr 2013 • 1 yr 4 mos

My work involves utilizing the Thesis theme framework. A PSD file will be sent over to me and it is my responsibility to convert these designs into a responsive website using the Thesis theme.

## **Next Level iMedia**

**WordPress Theme Developer • Freelance**

Jan 2011 - Jan 2013 • 1 yr 11 mos

I work for their existing website which utilizes WordPress. I am making changes or additions to their website as per client requests.

## **MosierData**

**WordPress Plugin Developer • Freelance**

Aug 2012 - Oct 2012 • 3 mos

The client is asking to create a web scraper which would be built as a WordPress plugin. The plugin would be fed with a CSV file that contains a long list of websites. The scraper would be run

as a cronjob which queries 100 websites every 10 minutes. This will then check if the website is a WordPress website and will output the result.

## IDX Web Designs

**Junior Web Developer** • Full-time

Sep 2012 - Aug 2011 • 1 yr

I work as a junior web developer for the company. As a junior level, my obligation was to familiarize myself with Soholaunch, Joomla, and WordPress. I was also given small roles in web design. After leaving the company, I opted to specialize as a WordPress developer and pursued my career in freelancing. NOTE: This company is no longer operating.

## Try BPO Outsourcing Solutions

**SEO Specialist, Part-time Programmer** • Full-time

Jun 2009 - Aug 2010 • 1 yr 3 mos

I work as their virtual assistant SEO specialist from their parent company, eLocal.com. During my tenure as an employee, I was given a web development project. This outcome resulted in pivoting my career as a web developer. NOTE: This company pivots into empireflippers.com.

---

## HOBBY PROJECTS

### MERN stack App

Aug 2024 • [🔗 Site Link](#) • [🔗 Github Link](#)

This is a MERN stack project completely functional from the sign in, sign-up, to the creation, editing, and deletion of posts.

**Tech stack:** Mongo DB • Express • React • Node.js • Axios • Material UI • Tailwind • Redux • React Router

### Sanity Flutter demo

Jun 2024 • [🔗 Github Link](#)

This is a mobile demo app that utilized the Sanity CMS sample movie dataset.

**Tech Stack:** Flutter • Dart • Sanity

## Single Sign-on with Firebase (WordPress Plugin)

Jan 2022 - Present • [Github Link](#)

This is a WordPress plugin that lets you sign in or sign up with Social media such as Google and Facebook. Firebase acts as the middleware for authenticating Google and Facebook accounts, then for WordPress sign-in.

**Tech Stack:** WordPress • PHP • React • JavaScript • Firebase

## WordPress Instance with Docker

Jan 2019 - Jan 2021 • [GithubLink](#)

This is a docker-compose template that lets me spin off my own WordPress environment. Traefik serves as a middleware for url proxy.

**Tech Stack:** Docker • WordPress • PHP • MySQL • Traefik
